(54) Title: A METHOD FOR STEERING AN OSCILLATOR AND AN OSCILLATOR

(57) Abstract: A method to control a frequency oscillator, as a crystal oscillator, and to form an oscillating circuit in order to produce a frequency oscillator improved to its qualities, in which the frequency of reference oscillator (1) is changed by means of frequency multiplier (2) into output frequency. As frequency oscillator a low frequency oscillator (1) is used, the control of which output frequency (5) is carried out adjusting the low frequency oscillator (1) by means of control arrangement (4).
